WILL IT BE WAR?

The present outlook indicates that the French Government will proceed with ts attack upon Siam under the pretense that the reply of the King to France's ltimatum is not satisfactory, and the combardment of Bangkok may be the ext act of hostility to be recorded.

If this should prove true, the explanaion that the assault on Slam is a pofect favorable to the Government party n the coming French elections, will be insufficient. The renly of Slam to the French demands certainly makes most mportant concessions. If it does not at once yield all that France asks in the matter of territorial surrender, it conedes so much that nothing remains but a question of boundary. It is not prob-able that, having secured the admission of the principle for which the French have contended, France would recklessly invite a general war, unless in pursu-

ance of a prearranged policy, looking beyond the mere dispute with the Siamese Government. The next movement will be watched with interest. What will England do if the French continue the attack? What

Siam, what will be Russia's posicion? What will be Germany's action in view of the evidence of a secret alliance between France and Russia, threatening in the future a war of vengeance for the umiliation of Paris and the dismem erment of France?

All that France has demanded of Slam is practically yielded in the reply to the French ultimatum. The surrender of territory on the left bank of the "from the contracts for the supply of Mekong; satisfaction for the wrongs and injuries alloged to have been in se paper to the bank deposits for the sales flicted on French citizens in Siam; the punishment of Slamese officials and subjects who have been guilty of offenses against national or international law; the payment of compensation for osses sustained by France or French men, and the deposit of money to guar antee indemnity, all are conceded. If question of the exact extent of territory still remains open, it is scarcely doubt ful that Siam would yield when the dispute referred only to degree and not to orinciple. Will the approval of the civworld be with France if sh hould, under such circumstances, reck lessly invite a general war that might terrible loss of life as well as

The Sick Bables' Fund amounts to the splendid sum of \$3,580.55 to-day their unfortunate fellow-babies. How much the poor, sick children need the sympathy and assistance of the wealthy and healthy children may be conjectured from the alarming increase in the death

For the week ending Saturday nor the mortality of the city aggregated 1.257; this is an increase of 161 over the preceding week, and 241 in excess of the Faved for the Sick Babtes' Fund, hoping t average for the corresponding week of the past five years.

The increase in deaths was due chiefly to diarrhoeal troubles, which carried off 464 persons; of this number 424 were children less than five years of age, showing an increase of 131 over the corresponding week of the last five years Of the other fatal diseases that contributed to the increase, diphtheria caused the death of 36; bronchitis, 26, and pneumonia, 62. The total number of deaths among children from all causes was 793, and of this appalling number 607 were infants under one year. There were 906 deaths in the tenement districts; the public hospitals and charitable institutions contributed 227 to the death roll, leaving but 125 among private residences, showing the awful destruction of bad air, bad food, bad water and bad sanitary conditions to human

and bad sanitary conditions to human life.

Last year the week ending July 20 closed with a death record of 1,434 deaths, the highest in the history of the New York Health Board. The present week, therefore, is both feared and dreaded by the city authorities, and if the weather predictions are realized and the sizzard returns it will go hard with the children of the poor. Last week the strain on the Fresh Air Fund and Floating Hospital Societies exceeded their resources; the left-overs on two excursion days numbered about 1,200 each. This week strenuous efforts will be made by each association to carry every mother and alling child who applies out of the city.

themselves with fleeting fame by rescuing a young man who was drowning. If the rescuing party had been composed of one girl instead of four there might have been a romantic sequel. As it is, the young man is placed in a most embarrassing position.

### ROCKAWAY'S BIG FIRE

Jamieson & Bond's Ice Factory Destroyed: Loss About \$20,000

Jamieson & Bond's big ice factory and of ruins to-day, as the result of a fire that occurred there yesterday afternoon. There were more than the usual number of exciting incidents connected with the fire, and rumors of the most startling character gained currency in New York and Brooklyn. At one time it was said the excursion steamer Grand Re public was burning with 700 souls aboard Another rumor was that the Long Beach Hotel was destroyed

The fire started with a small blaze in

The fire started with a small blaze in the swamp grass, but it occasioned no alarm. Later, however, the big ice-house alongside the railroad track, on Bond avenue, caught fire, and it attracted most of the thousands of visitors to the scene.

The building was one of a row of frame structures, and it burned rapidly, sending out showers of sparks.

In the crowd were Annie and Maggie Ford, of 59 Dean street, Brooklyn. They wore light Summer costumes. A spark set Annie's dress aftre, and the clothing of her sister, who tried to put out the lase, also caught.

Both girls would have been seriously injured had it not been for Emil Stadelmair, of 757 Hart street, and L. Cone Teller, who came to the assistance of the girls and extinguished the blaze. Annie was slightly burned, but went home with her sister.

The buildings were burned to the ground. The loss is estimated at \$20,000.

Over one cake spread a pint of whipped cream weeten to taste, into which has been stirred one large banana sliced thin. lay the other over it and serve very

Merinaid of Orkney.

News has reached Kirkwall, says the cotsman, that the mormaid has again made her appearance at Deerness, Ork-The creature has arrived at the same place now many years in succestion, where it remains all Summer, disappearing in the Winter, and returning egain in fine weather. Last year a arge sum of money was offered for its apture, and sportsmen tried to kill it As it struck out to sea immediately it was fired at, and was never seen sever till now, it was thought it had been wounded or killed. Naturalists who have got a full description of the "mermaid"think it is an ocean seel, but the people of Deerness, who have watched it closely for years, say it has few it any of the seal's habits, and maintain it swims like a human being. At the present time it may be observed daily. being very partial to bright sunshine, but it rarely appears on dull days.

Rhubert Pudding. Skin the stalks and cut in slices about

half an inch long. Butter a puddire dish and lay in it enough slices e bread and butter to cover the bottom Put in a layer of cut rhubarb. Sprinkle thickly with augar. Alternate of bread and rhubarb until the dish is full. Cover and steam for half an hour. we the cover and put in the over until brown. Serve with hot sauce. Plowers and Passe.

The decorative properties of a handsome vase are by no means to be de-

them. They can be put even in the ponderous jars that stand shoulder-high on the floor But fi you have only a few roses it is well to discriminate. You often have dosen or so, and you are in the habit of

putting them all together in the prettlest vase. But does not the doing this often One rose is so sadly crushed by the operation. Another has its prettiest side turned away. A third has to part with

row all will wilt together. It is a disappointing pity. beat all together well in a mortar, with But try this way. Take the very best tie pepper and sait. Toast some bread, itself. If you have not a long, narrowones of that kind. A rose is far too fine

Very long-steinmed "Jack" roses and American Beauties may be bunched. Their stems are long enough to allow each rose to rear its head proudly aloft to be admired by itself. Round cut-glass rose jars come in for holding a bunch of roses. They can be bought for from thirty-five cents for the small, common

ones in cut glass.

Elegant Yachting Tollet. Simple elegance characterizes the yachting tollet here plotured made of white duck and appropriately fluished with machine-stitch ing. White duck and pique, by the bye, are among the most approved fabrics for totlets of this description.

While the other is uniform in weave.

The net of the lace is called by lacemakers the reseau, the pattern is the at the centr of the back, a gore is inserted ranged in box platt. The skirt is fourreau
